# NOXADRENE<sup>®</sup> EXTREME

**NOXADRENE EXTREME<sup>®</sup>** combines the power of NOXADRENE<sup>®</sup> and the added benefits of a CREATINE COMPLEX, TESTOSTERONE BOOSTER and L-GLUTAMINE for even more muscle growth, energy and muscle recuperation.

Of particular interest to bodybuilders is hemodilation - the ability to cause long lasting blood flow to the muscles - promoting muscle growth, increasing strength, accelerating muscle recovery, and giving an awesome pump!

NOXADRENE EXTREME™ is a complete "cell volumizing" formula containing 7 powerful components:

1. **Arginine-Alpha-Ketoglutarate (AAKG)** known as a precursor of the gas Nitric Oxide (NO<sub>2</sub>) and catalyst for NO<sub>2</sub> synthesis.
2. **Arginine-Ketoisocaproate (AKIC)** to further the effects of NO<sub>2</sub> production.
3. **Ornithine-Alpha-Ketoglutarate (OKG)** which preserves muscle protein synthesis and spares nitrogen.
4. **Glutamine-Alpha-Ketoglutarate (GKG)** which helps support cell volumizing by preserving the amino acids glutamine and taurine, and increases amino acid transport.
5. **Creatine Complex ((Monohydrate, Phosphate and Pyruvate)** helps to increase muscle mass, strength and recovery from muscle fatigue.
6. **Tribulus Terrestris** increases the natural levels of Testosterone in the body.
7. **L-Glutamine** Prevents muscle breakdown! It is also a major source of energy for the entire body and builds, repairs, and maintains muscle tissue.
