[HYDROXYHYPERFORIN]

CELEXIL™ contains a proprietary formula called Hydroxyhyperforin. This proprietary formula was developed specifically to help fight depression and anxiety.

CELEXIL

[HYDROXYHYPERFORIN]

CELEXIL contains a proprietary formula called Hydroxyhyperforin. This proprietary formula was developed specifically to help fight depression and anxiety.

What is Celexil?

One of the primary ingredients in CELEXIL, hyperforin, is an effective treatment for depression. Clinical research shows that hyperforin relieves depression and anxiety as effectively as many prescription medications, but often with fewer side effects.

Hydroxyhyperforin

CELEXIL™ contains a proprietary formula called Hydroxyhyperforin. This proprietary formula was developed specifically to help relieve mild depression and anxiety. One of the primary active ingredients in CELEXIL, hyperforin, is an effective treatment for mild depression.

Clinical research shows that hyperforin aids in mood support and the reduction of anxiety. This formula also contains 5-hydroxytryptophan (5-HTP). Your body converts 5-HTP into serotonin, a neurotransmitter that regulates mild depression, anxiety, sleep and aggression. A daily dose of CELEXIL contains 50mg of 5-HTP, an amount carefully selected to gently increase serotonin levels.
